2020/21 FALL - WINTER YARN COLLECTION

2020/21 New Yarns

The first novelty of **Borgo de' Pazzi** Winter collection is **Chloe** yarn: very soft and with a "tweed" effect, which gives an elegant look combined with originality.

Elia is the second "new entry": a light and voluminous yarn, with a precious composition; the "boutonné" effect originates from the inner part of the yarn itself. It is suitable for soft and enveloping Winter accessories.

Julia: a brilliant novelty, a twisted yarn with a rich and bizarre composition. From the crossing of these fibers a very soft, shiny and enveloping yarn is born. It is recommended for every use from the small accessory to a knitted coat.

Nike, the most precious novelty of the year. A twisted yarn with a very rich composition. A mix of softness and brilliance: merino, bamboo and baby camel, counted among the finest fibers in the world of "luxury" yarns, which gives an exceptional lightness. Nike is suitable for any type of garment that enhances its softness.

Bibi will continue to be one of our most original yarns, appreciated by those who love unconventional products. Ideal for accessories, it also allows you to create unique sweaters.

Bice, a yarn with superwash wool that is very soft and resistant at the same time. Suitable for socks but also for knitted garments. Available in "ton on ton" color variants.

Bio: roving yarn in natural, untreated, undyed wool.

Bulky, Grosso e Stout: in the natural or dyed versions, they are still part of our "classical" collection. Produced using European and South American wools compliant with Oeko-Text® certificate. These yarns are entirely produced and dyed in Prato, as are all of the other yarns in the collection, which offer a greater palette of shades as compared to wool.

Still available in collection, **Tweed** and **Kuki**, in their wonderful color variants

Cedro New: already part of the last years' collection - is created using fluffy, high loft French wool. Available in both natural and dyed versions.

Clara: a yarn that recreates, through the combination of wool and cotton fibers, the "stone washed" effect on knitting. Very light and durable it is suitable for sweaters, outerwear, scarves and hats.

Genio: a precious yarn that mixes bamboo fibers, Kid Mohair and merino wool. The yarn is soft and naturally bright. The garment made with this yarn is very light, warm and soft.

Luna: our classic, best seller "roving" yarn, that reaches a range of 45 colours in this collection.

Magic Kette: an eclectic, fun to knit yarn, in printed and gradient versions. To create a unique garment, you will first have to rip out (yes, that's right) this tubular ribbon yarn, thus achieving unique colour changes which would, otherwise, be impossible to create.

Milly and Milly Due (double thread Milly, bulky yarn): recreate the typical tweed: suitable for either men and women garments. Milly Due is perfect for hard and rugged outdoor wear. The matter finish tweed is ideal for classic and casual wear like sweaters, ponchos, hats and mittens.

Naturalia, Naturalia Alpaca, Naturalia Jaspé: 3 different blends for our yarn that continues to be successful after over a decade. Untreated, undyed.

Prima: a creative and elegant yarn, a great gradual nuance in 100% Peruvian wool, ideal for exclusive garments with a unique design. Ideal for accessories, scarves, gloves, but also women's sweaters.

Puno: a carded yarn with fluffy, high loft "boutonné" alpaca.

Rita: precious yarn with cashmere and extra fine merino wool with "ondé" effect; soft and precious, for "hugging" garments.

Stella: a light and bright mix of bamboo and polyamide, suitable for light, mid-season garments.

All of our yarns are produced and dyed in Italy and meet the requirements of the European directives on non-toxicity set forth by the Reach Regulations.

**We provide the stores that sell our yarns with "web" format photos of all the yarns we produce in all available colors.*

If you have a yarn store and are interested in our new yarns, please contact us for our wholesale prices.

Novità 2020/21

La prima novità di questa collezione **Borgo de' Pazzi** è il filato **Chloe**, morbido e con effetto tweed, che lo rende elegante ma originale. Perfetto per realizzare sia maglioni che accessori.

Il filato **Elia** è un'altra "new entry": arioso e voluminoso, con effetto bottonato colorato, inserito all'interno della struttura del filato stesso. È adatto per morbidi ed avvolgenti accessori da indossare nei giorni freddi.

Julia: un filato ritorto dalla composizione ricca e bizzarra. Dall'incrocio di queste fibre nasce un filo morbidissimo, con effetto lurex. È consigliato per ogni uso: dal piccolo accessorio fino ad un cappotto di maglia.

Nike, l'articolo più prezioso. Un filato ritorto con una composizione ricchissima. Un mix di morbidezza e brillantezza: merino, bambù e baby camel, dall'eccezionale leggerezza, annoverata fra le più pregiate fibre nel mondo dei filati di "lusso". Nike è adatta per ogni tipo di lavorazione che ne esalti la morbidezza.

Bibi continuerà ad essere uno dei nostri filati più originali e apprezzati da chi ama i prodotti non convenzionali. Ideale per accessori, permette di creare anche maglioni unici nel loro genere.

Bice, un filato in lana superwash, morbida e resistente. Perfetto per calzini, scialli e maglioni. Disponibile in 32 colori tono su tono, di cui ben 20 nuovi.

Bio: lana naturale non trattata e non colorata.

Bulky, Grosso e Stout: nelle versioni naturali (pura lana non colorata) o tinti, continuano ad essere tra i nostri filati classici. Prodotti con lana europea e sudamericana (certificata Oeko-Text®) e tinti a Prato, come tutti gli altri filati in collezione, il che garantisce una vasta gamma di colori.

Sempre in collezione **Kuki e Tweed**, nelle loro splendide varianti.

Cedro New: in versione naturale (lana non colorata) o tinta

Clara: combinazione di lana e cotone che crea un meraviglioso effetto "stone washed". Leggero e resistente, perfetto per maglioni, giacche e accessori.

Genio: filato dalla composizione preziosa (merino, bambù, kid mohair). Soffice e naturalmente brillante. I capi realizzati con Genio risultano leggeri, caldi e morbidi.

Luna: il nostro classico stoppino; un "best seller" in 45 colori. Voluminoso, morbido, leggero, adatto alla realizzazione di qualsiasi capo.

Magic Kette: il nostro filato più eclettico, in versione stampata o gradient. Per un miglior utilizzo, è consigliabile prima disfare il tubolare e realizzare un gomito: in questo modo otterrete sfumature di colore uniche.

Milly e Milly Due (Milly a due capi): ricreano un bellissimo effetto tweed, caldo e leggero, adatti sia per uno stile classico che casual. Perfetti per capi da uomo e da donna. Milly Due è adatto per giacconi o accessori invernali.

Naturalia, Naturalia Alpaca, Naturalia Jaspé: 3 composizioni diverse per questo nostro filato che continua ad avere successo dopo oltre un decennio. Non tinta, non trattata.

Prima: filato creativo ed elegante, con sfumatura "gradient" in 100% lana. Ideale per capi esclusivi e dal design unico. Perfetto per scarpe, guanti e maglioni da donna.

Puno, filato cardato in soffice alpaca "boutonné".

Rita: filato in prezioso cashmere e merino extra-fine, con effetto "ondé"; ideale per la creazione di capi eleganti.

Stella, leggera mista bambù/poliammide. Perfetta per creare capi leggeri da mezza stagione. In ... splendidi colori.

Tutti i nostri filati sono prodotti e tinti in Italia, in accordo con le direttive europee di non tossicità del Regolamento Reach.

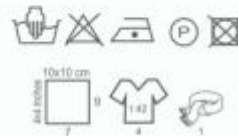

**Possiamo fornire materiale fotografico ai negozi che vendono via web. Se hai un negozio e sei interessato ai nostri filati, puoi contattarci accedendo al listino prezzi.*
